

Hello Everyone,

Thanks to a generous, anonymous donation to our nonprofit, the CSED is able continue our Radiant Barrier Program at an affordable cost to property owners in our Lower Ninth Ward Community.

To-date, the CSED has installed radiant barrier in 114 homes in the Lower 9<sup>th</sup> Ward!!!

The attic of a house gets extremely hot, especially in the summer, even reaching temperatures of over 140 degrees. Radiant barrier is construction grade aluminum foil that can be stapled to the rafters of your attic to lessen this effect, increase your comfort, and **save you money on your utility bill!** The radiant barrier we install is rated to reflect 97% of radiant heat from the sun thereby lowering an attic's temperature by up to 30 degrees. This prevents the house from getting too hot, and makes it easier for your air conditioner to cool the house. Energy savings are approximately 10% annually and greenhouse gas reductions are substantial...good for you and Mother Earth! Radiant barrier can be installed at any time, before or after your house is renovated and occupied. All you need is a roof in good condition.

<u>Square Footage of Attic</u>	<u>Your total Cost installed thru CSED</u>	<u>Estimated Retail Cost</u>
1,000 Sq. Ft. or Less	\$275	\$948+
1,001 - 1,800 Sq. Ft.	\$300	\$1040+
1,801 Sq. Ft. or More	\$350	\$1500+

We invite you to join your neighbors and become part of **THE RADIANT NINE** today!
